THE POINT OF SALE
SYSTEM THAT WILL
REVOLUTIONIZE
YOUR BUSINESS
FOR FREE!*

HARBORTOUCH

The Harbortouch POS Elite system delivers a high quality POS system that is unmatched in both reliability and usability

TAKE ADVANTAGE OF STREAMLINED OPERATIONS

Manage multiple operations through your Harbortouch POS system: accept cash, checks, credit and debit, place orders, access reports, track inventory, and manage employees with the built-in time clock.

GET A TOP LEVEL VIEW OF YOUR BUSINESS WITH ROBUST REPORTING

A wide range of comprehensive reports allow you to monitor financials, track inventory, view sales history and identify sales trends.

UTILIZE COUNTLESS TIME AND MONEY SAVING FEATURES

Increase operational efficiency, minimize ordering errors and reduce shrinkage. More accurate employee time tracking reduces payroll while Harbortouch's reporting capabilities help you decrease accounting and book-keeping expenses.

BENEFIT FROM ADVANCED SOFTWARE WITH TOP-OF-THE-LINE HARDWARE

State-of-the-art POS software provides all the features and functionality needed to support your business while high-end hardware provides the reliability you need.

PLUS:

- All-in-one design and cast aluminum body for maximum durability and sleek appearance
- Powerful processor delivers blazingly fast speed and flawless performance
- Massive storage to support even the largest inventories as well as extensive reporting data

LIFETIME GUARANTEE!
If your equipment ever malfunctions, we will replace it
FREE OF CHARGE!*

Countless Time & Money Saving Features!

Inventory Tracking

You can import your existing inventory database in a snap. Once your inventory has been uploaded, the system will automatically track how much of each item you have in stock.

Employee Management

Track your employees with a built-in time clock and view a detailed breakdown of hours worked for each employee or each day as well as their productivity. Security levels allow you to control the functions that particular employees are authorized to use.

Purchase Order Creation

You can create purchase orders directly through your POS system for easy inventory management and item reorders.

Employee Commissions

You can pay your employees commissions for selling particular products. Commissions can be awarded as a percentage of the sale price, percentage of the profit or a flat amount. Also, the salesperson for a transaction can be different than the cashier ringing it up.

Gift Receipts

Gift receipts list the items purchased without the prices so that customers can purchase a gift while enabling the recipient to return or exchange it without seeing the price. A bar code is printed on the bottom of the receipt for quick returns and exchanges.

Rentals

Harbortouch Retail supports item rentals for anything from tools and equipment to furniture and electronics. The customer database tracks the rental along with other pertinent information.

Flexible Pricing

Dynamically customize your product pricing within seconds to accommodate coupons, sales, and other discounts.

Vendor Management

Organize all your suppliers and other vendors in a single database to manage all of your important business relationships.

Color/Size/Style Matrix

Ideal for clothing and footwear stores, you can easily set up an attribute matrix that includes different colors, sizes and styles for a particular piece of apparel, streamlining the item selection and order process.

Customer Database

Keep a comprehensive record of customers' purchasing history and contact information to identify sales trends and best customers, ideal for loyalty and other incentive programs. This database can also be exported for direct marketing campaigns.

Integrated Payments

Combine multiple operations into one easy-to-use application. Accept credit, debit, cash, and checks through your POS system.

Gift Registry

Customers can make a list of items they would like to receive as gifts for a special occasion such as a wedding, graduation or new baby. The registry can be printed out so that shoppers can carry a copy around the store with them. Item quantities are automatically updated as purchases are made.

Layaway

Layaway allows customers to reserve a particular item to purchase at a later date. The customer can then make payments toward the item until it has been paid in full. Stock levels are reduced when an item is on layaway and automatically replenished if the layaway is cancelled.

Consignment

Consignment allows you to sell goods at your store on behalf of someone else. This software enables you to resell these items while tracking how much money should be paid to the consignor. Items commonly sold on consignment include antiques, clothing, artwork, tools, toys, musical instruments and hand-made items.

Reports

A wide range of reports, including your key performance indicators, will provide you with a top-level view of your operations so that you can make more informed and strategic business decisions. You will be able to view and sort valuable business data in a format that is easy to understand.
